Set accents with LECHUZA CUBICO!

Whether alone, in a pair or a cluster, the new column-shaped LECHUZA planters are an attractive element of design for home, office or lobby. CUBICO combines elegant, clear-cut design with the functionality of synthetic material. It is available in two sizes and in four classic colours. Depending on the plant, it can be extravagantly eye-catching or discreetly decorative. With the appropriate accessories, the CUBICO planter can be used either for soil-based planting with watering system, hydroculture or as a flowerpot holder.

Our world is becoming increasingly fast-moving and functional: plants create atmosphere and tranquillity, and in LECHUZA they set accents, with style.

CUBICO - Ø30/40 cm white, silver, charcoal, black - *Acorus variegata*

Container.

Mixed Stone Dressings

The use of stone dressings and cobbles can greatly enhance the appearance of any planted container or planting area and also help to retain moisture in the soil.

A photograph of a landscaped garden area. In the foreground, there is a paved path made of light-colored rectangular stones. To the left of the path, there is a dense planting of various shrubs and plants, including some with bright red stems. In the background, there are several tall, thin trees with bare branches, suggesting a late autumn or winter setting. The sky is overcast and grey.
